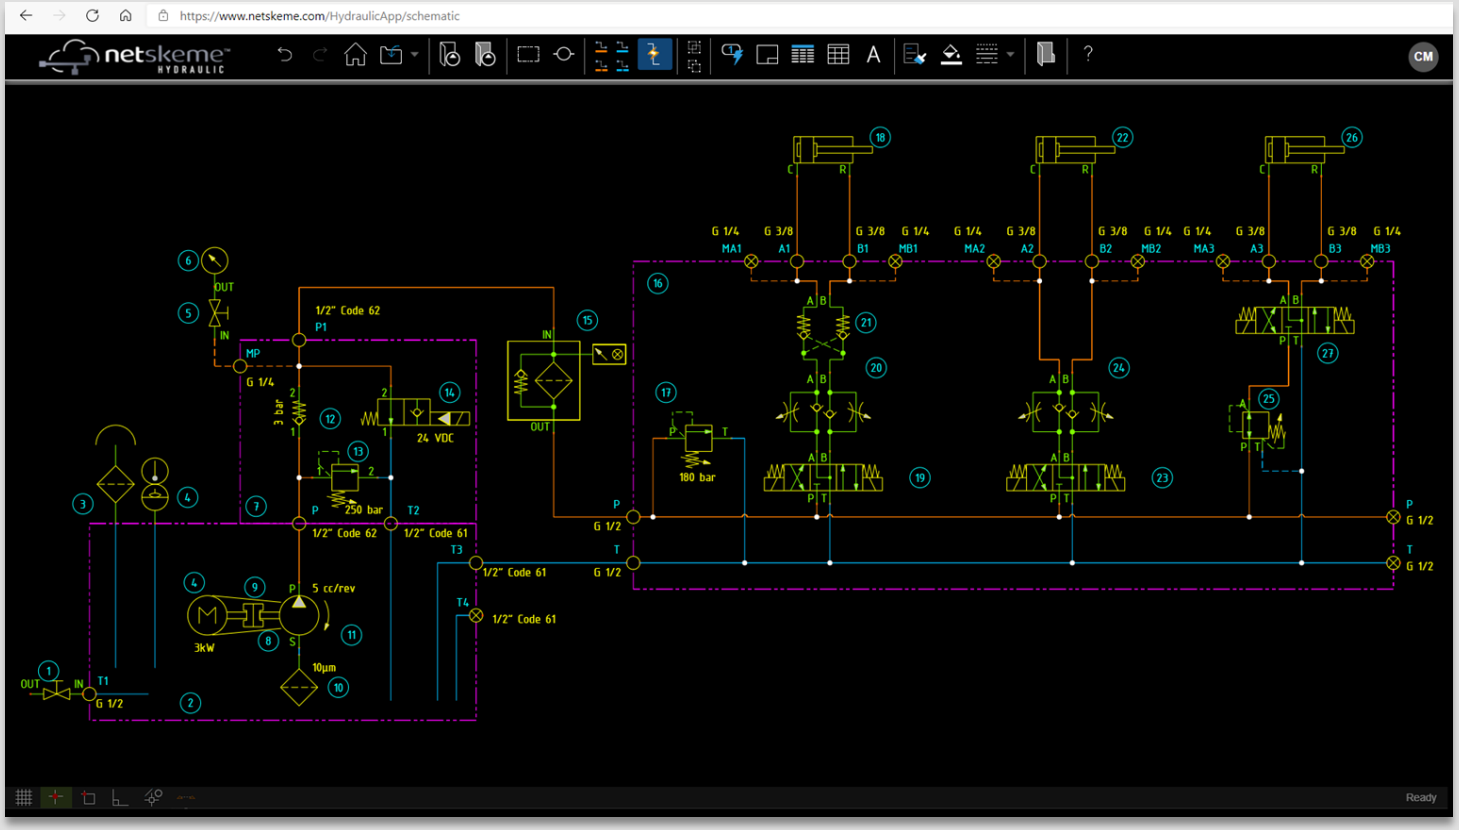
NetSkeme® April 2021

What's New



NetSkeme® What's New

Connection Line Rerouting

Flipping

Rotating

Moving

Line Spacing

Compatibility with other DWG Software

Envelope ID

Connection Lines

Enhanced Search

Wildcard Characters

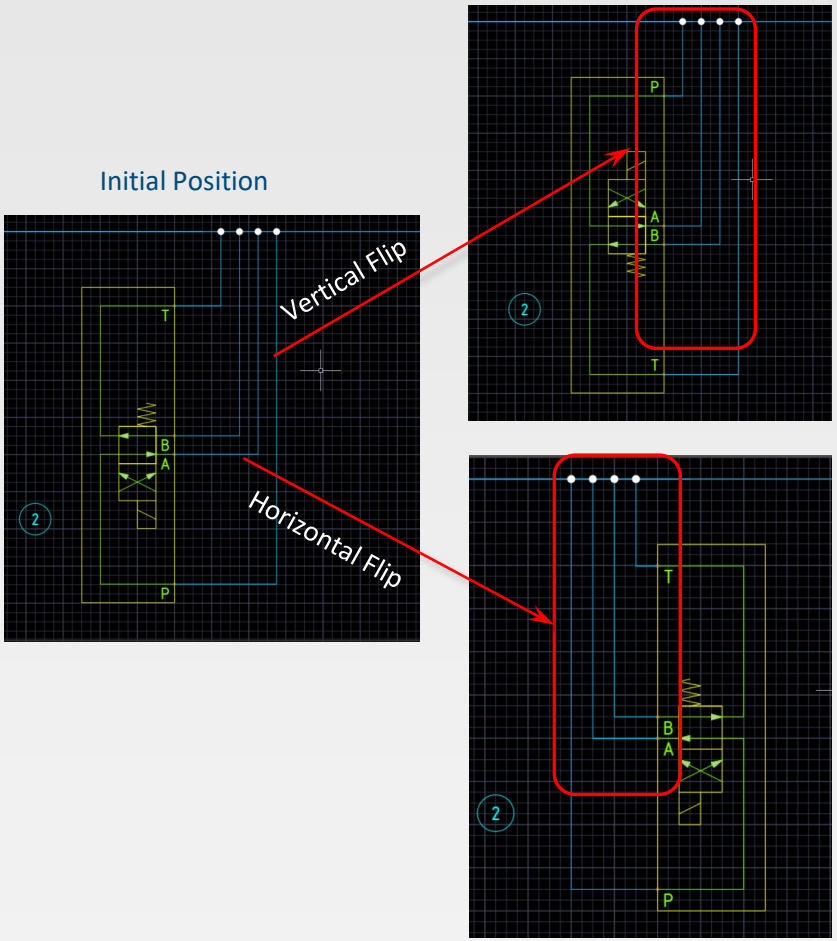
Connection Line Rerouting

Smart Routing of Connection Lines
on moving, flipping, and rotating symbols

NEW

Flipping Symbols

Connection Lines Rerouted on Flipping a Symbol

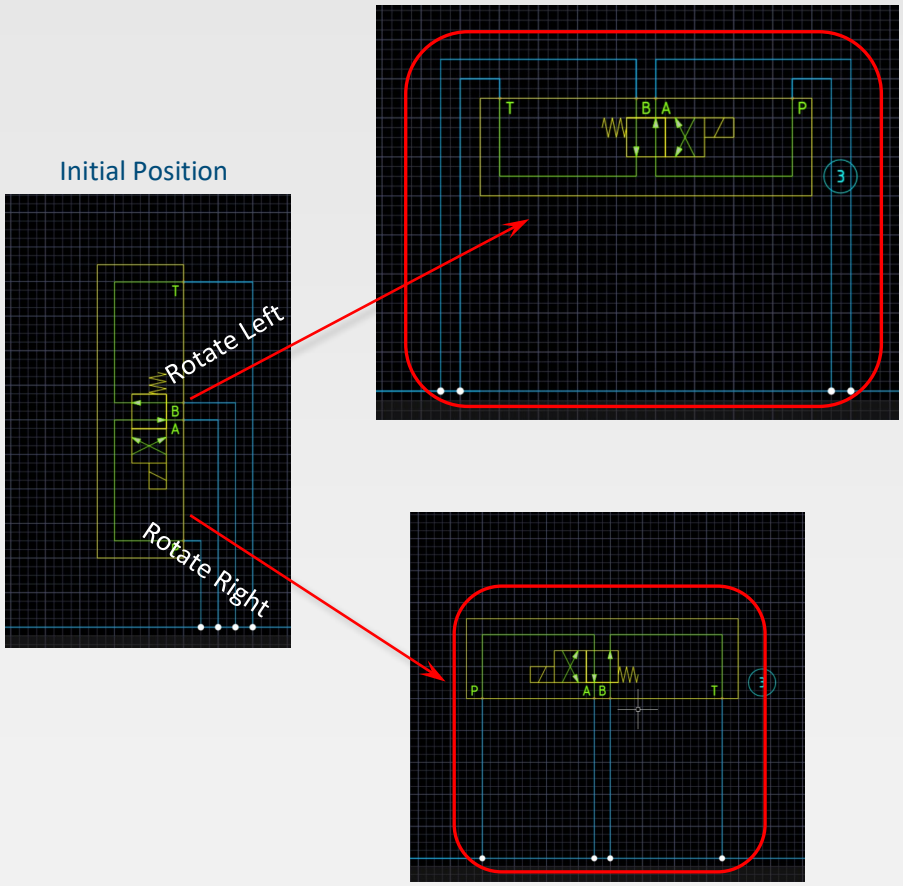


On flipping a symbol vertically or horizontally, connection lines reroute without overlapping.

NEW

Rotating Symbols

Connection Lines Rerouted on Rotating a Symbol



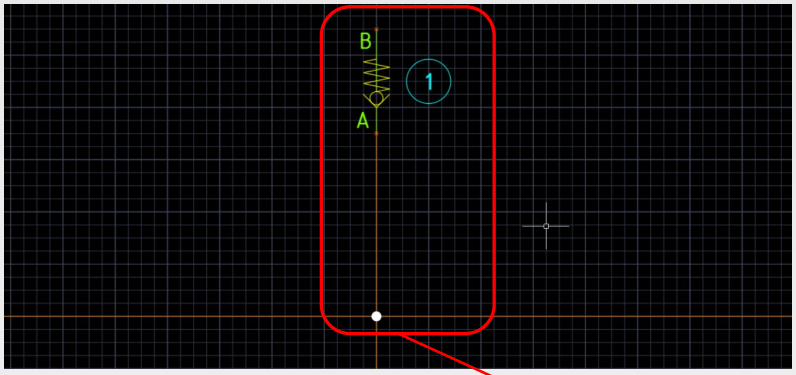
On rotating a symbol, connection lines intelligently reroute with the rotated symbol.

NEW

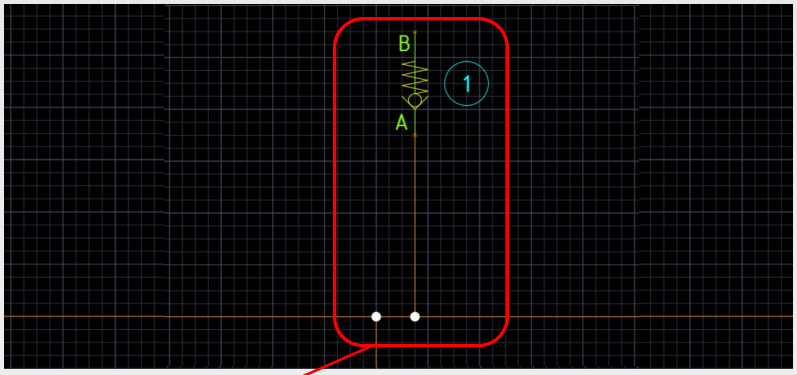
Moving Symbols

Connection Lines Rerouted on Moving a Symbol

Initial Position



New Behavior

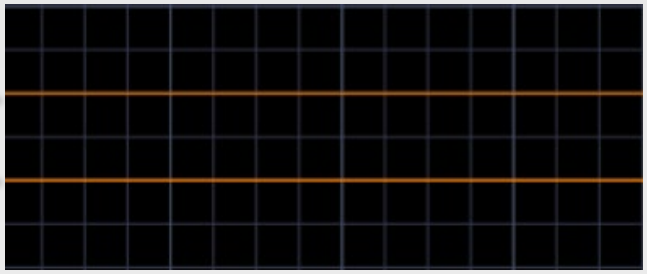


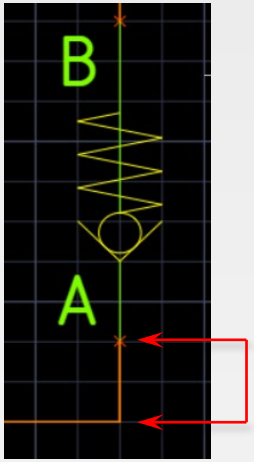
Connection dots and lines move along a single connection line when a directly connected symbol is moved (where applicable).

NEW

Line Spacing

4 mm gap maintained between connection lines (when possible)





Connection lines extend 4 mm out from symbols (when possible)

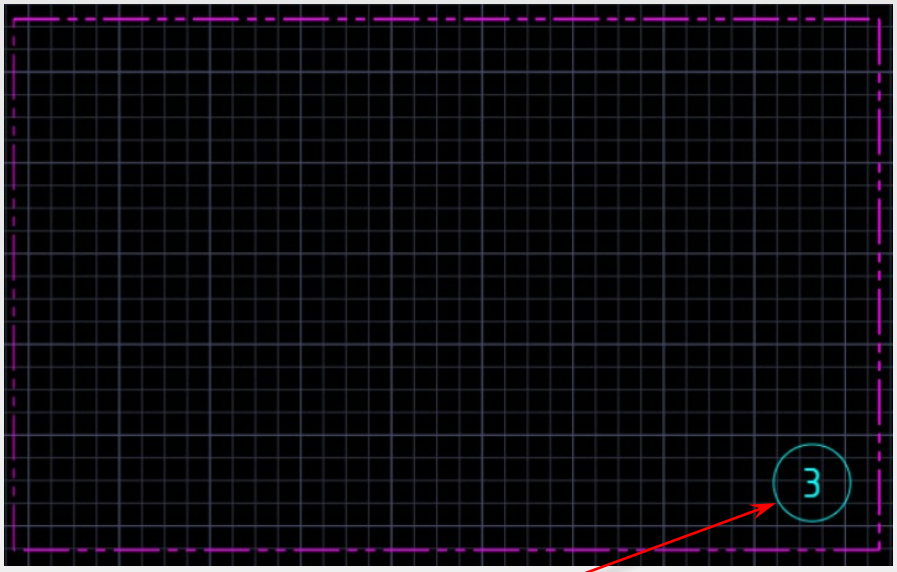
Compatibility with other DWG softwares

NetSkeme is now more compatible with other DWG platforms

NEW

Compatibility: Envelope Item ID

Reassign Item ID Function for Envelope



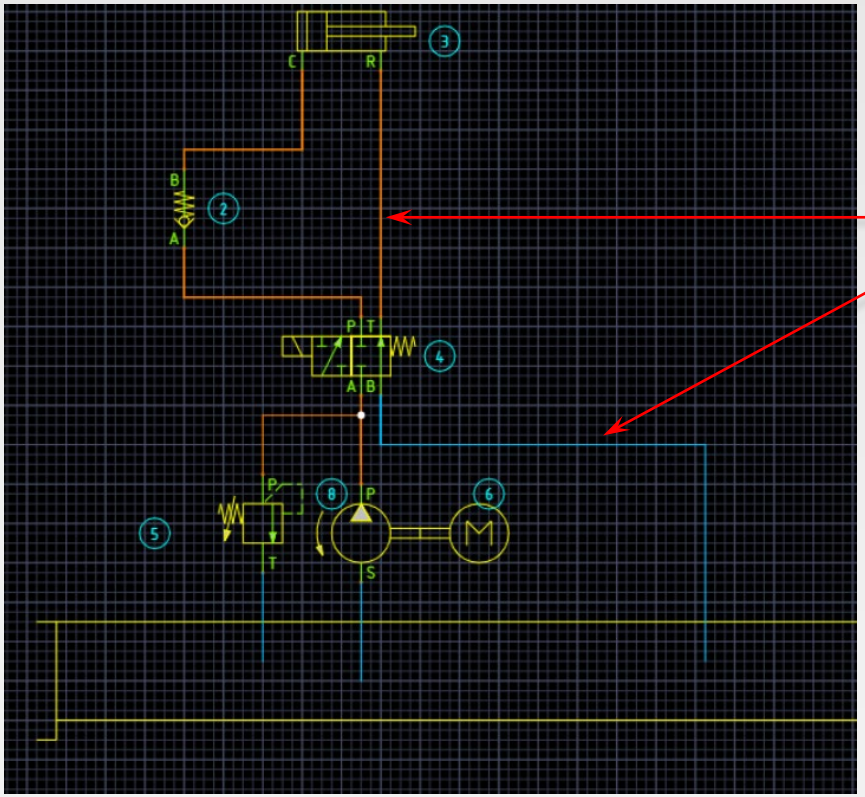
Envelope Item ID now carries over

If an Item ID is not present, use the reassign Item ID function to create Item ID for the envelope.

NEW

Compatibility: Connection Lines

Connection Lines created in other Drawing Platforms now Editable



Connection lines within schematics created using other drawing platform, such as WebCAD, EasyManifold, etc. now carry over and allow editing and connection to symbols.

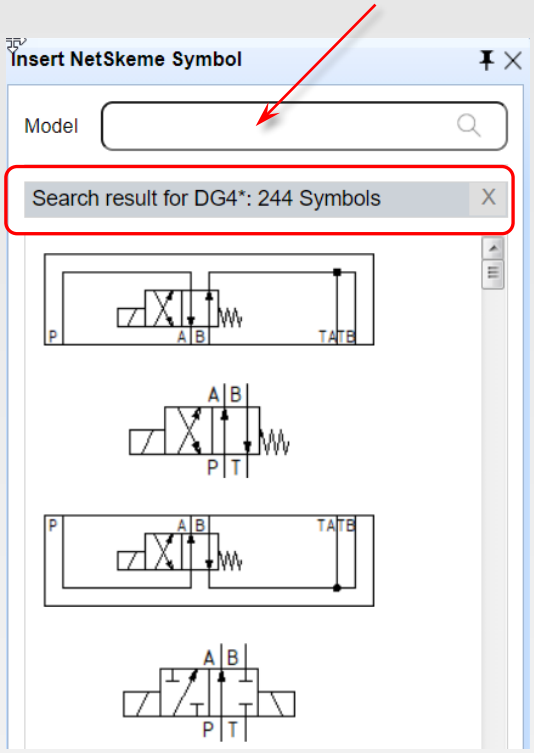
Enhanced Search

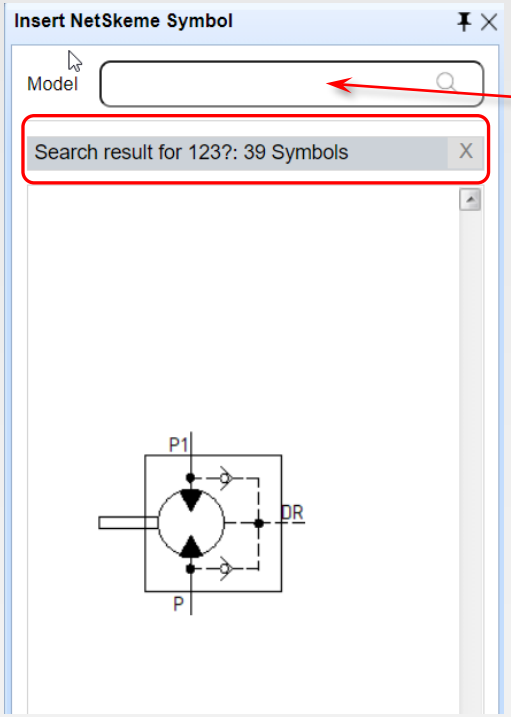
Search by Model Code using Wildcard Characters * and ?

NEW

Wildcard Characters

* for Series of Characters, and ? for a Single Character





Model Code Search now allows * and ? wildcard characters
